

Dental Research Study

Good Oral Health: a bi-level Intervention to Improve Older Adult Oral Health

Participant Name _____

Date of Research Examination _____

The dental exam you have had as part of the study is not a substitute for a regular exam in a dental office. Dental x-rays were not taken and a complete exam was not done, therefore there may be other dental problems we could not see.

The dental examiner recommends that you:

- Contact a dentist immediately, within 24 hours.
- Schedule a regular dental visit.

Please bring this paper with you to your appointment with the dentist.

Dentists are available at:

The University Connecticut School of Dental Medicine
263 Farmington Ave
Farmington, CT 06030

If you need to see a dentist within 24 hours please call 860-679-2325 and tell them you were seen as part of a dental research exam and were referred for urgent care.

To make a regular appointment call 860-679-3415 for a dental screening appointment that will lead to overall care.

OR if you have Medicaid you can also call

Connecticut Dental Health Partnership (CTDHP)
866-420-2924 or 855-CTDENTAL (855-283-3682)
